

Patient Name:

Appointment Date:

Practitioner:

Fax:

Total Pages: 6

Practitioner's 3 Easy Steps for the visit:

1.  Complete the

Face-to-Face form* and the Prescription form during the exam

2.  Document in the chart note

that a mobility evaluation occurred (if a mobility exam occurred during the appointment)

3.  Fax

- The Face to Face Examination Form
- The Prescription Form
- The Chart Notes

to

If you have questions please call

(888) 344-2181

Confirmation of the prescription will follow.

*Practitioner has the choice on how to document the need for PMD; simply complete the attached form, download the form yourself for completion, or address all of the form questions in the patient's chart note.

Date of Evaluation: _____

Patient's Name: _____

Ambulatory Status in Relation to Mobility Related Activities of Daily Living (MRADL) in Home

1. Without a mobility aid, how far can the patient safely walk without stopping? _____ ft.
Does this distance allow the patient to independently accomplish **ALL** MRADL in the home in a safe and timely fashion?
 Yes No If No, please describe: _____
(e.g., required significant rest, risk of falling, can only do once per day, etc.)
2. Please select all MRADL that your patient is unable to accomplish in the home in a safe and timely fashion due to mobility limitations.
 Feeding Bathing Grooming Dressing Toileting Other: _____
3. Does the patient have the ability to stand from a seated position without assistance?
 Yes No If No, please describe transferring options the patient could use: _____

Mobility Determination Questions

1. Can a cane or walker meet this patient's mobility needs to independently accomplish **ALL** mobility related activities of daily living (MRADL) in the home in a safe and timely fashion?
 Yes No If No, describe the condition and/or diagnosis related to the safe and timely completion of their MRADL:

2. Can a manual wheelchair meet this patient's mobility needs to independently accomplish **ALL** MRADL in the home in a safe and timely fashion?
 Yes No If No, describe the condition and/or diagnosis related to the safe and timely completion of their MRADL:

3. How has your patient's condition/functional limitations changed so that they now require a power mobility device to complete their MRADL inside the home?

Patient's Name: _____

Mobility Determination Questions (cont'd)

4. In order to qualify for a power wheelchair, you must consider and rule out a power operated vehicle/scooter.

Some of the limitations of the power operated vehicle/scooter or reasons a patient would not be able to use a power operated vehicle/scooter are listed below. Check all applicable limitations or conditions.

- Patient requires elevating leg rest (ELR)

Examples of limitations/conditions include:

- Patient has a musculoskeletal condition or the presence of a cast or brace which prevents 90 degree flexion at the knee
- Patient has significant edema of lower extremities that requires having an elevated leg rest
- Patient meets criteria for and has reclining back on wheelchair

- Patient requires fully reclining back seat

Examples of limitations/conditions include:

- Patient has a risk for development of a pressure ulcer and is unable to perform a functional weight shift
- Patient utilizes intermittent catheterization for bladder management and is unable to independently transfer from the wheelchair to the bed
- Patient's home presents insufficient space for maneuvering power operated vehicle/scooter

- Patient requires adjustable height armrests

Examples of limitations/conditions include:

- Patient requires an arm height that is different than that available using nonadjustable arms
- Patient spends at least 2 hours per day in the wheelchair

- Patient is unable to safely operate power operated vehicle/scooter

- Patient presents poor trunk stability
- Patient needs special seat cushion for skin protection

- Patient requires joystick controller

- Patient cannot operate handlebar controller

- Other: _____

- None of the above limitations apply. Therefore the patient may not qualify for a power wheelchair, however the patient may qualify for a power operated vehicle/scooter.

5. Does the patient have the physical and mental abilities to safely operate a power mobility device in their home?

Yes No If No, describe why:

6. Is your patient willing and motivated to use power mobility equipment in their home?

Yes No If No, describe what findings support that the patient is not motivated to operate a power mobility device in the home:

- Based on this face-to-face evaluation, the patient has functional limitations that support the need for a **standard power mobility device** and does not require further evaluation.
- Based on this face-to-face evaluation, the patient has functional limitations that support the need for a **complex rehabilitation power mobility device** but a specialty evaluation is required. (A specialty Seating/Mobility Evaluation will be scheduled and a follow-up assessment completed within the next 45 days.)
- Based on this face-to-face evaluation, the patient **does not** have functional limitations that support the need for a power mobility device and does not require further evaluation.

I certify that the information provided is a true and accurate representation of my patient's current condition and that a major reason for the visit was a mobility examination. I hereby incorporate this document into my patient's medical record.
